SOCIETAL IMPACT AND MEDIA DISSEMINATION

* **Expert consultancy:** I have served as family policy advisor of Governments (e.g., the Catalan government) to help designing family policies that support low-income and lone-parent families. I have also served as consultant of international organisations (e.g., International Labour Organisation) to measure and conceptualise domestic and care work at a global scale. My active contribution in translating empirical research to **high societal and policy impact** shows my effort and success in making “real-world” impact from my scientific expertise and empirical research.

* **Scientific policy reports:** I have been actively involved in an €8,4 million project titled *EqualSOC* (*Economic Change, Quality of Life and Social Cohesion Network of Excellence*), funded as “Network of Excellence” by the European Commission (2005-2010). This large cross-country consortium acted as a scientific think-tank that produced reports based on scientific outputs around social and economic equality and cohesion to provide practical recommendations to policy makers, markets, and society. As part of this network, I participated in various meetings and reports that provided **practical recommendations to policy makers and the large society** to promote social and gender equality.

* **Evidence-based practical tools:** As the leading Irish-based PI of the EU consortium *DIGYMATEX* (2020-2025), a €3.5 million project of 12 partners and establishes synergies between researchers (e.g., from sociology, economics, business, psychology, media, computer science) and industries (i.e., IBM), we are building developing a new tool: the **Digital Maturity Index (DIMI)**. The DIMI is an evidence-based tool that we are currently testing across multiple European countries to measure and improve the positive experience of young people with digital devices and maximise their well-being and minimise risks related to social media and screen-based time. After testing the DIMI, we will provide practical tools through mobile-app applications across multiple stakeholders (from industry to schools and public organisations). DIMI is supporting families and young people in their everyday digital life.

* **Collaborations between science and organisations:** I lead research together with **local organisations** that promote positive well-being and mental health among parents and children, and I am currently working with schools to develop digital support tools for adolescent well-being, based on our school-based interventions. I am the leading PI of a collaboration between the leading Irish non-governmental organisation supporting lone-parent families (*One Family*) and my research team, which seeks to understand and promote the social support and well-being among lone parents (particularly mothers) and their children, particularly in Ireland. Through this cooperation between science and non-governmental organisations, my research team is providing new instruments and knowledge that are useful to understand and promote the mental health of lone mothers and their children.

* **Public and media dissemination:** My research is regularly covered by leading media in Spanish and English: **(a) Newspaper & radio coverage and interviews:** El País, El Periódico, 20 Minutes, Público, El Mundo, Europa Press, Eldiario.es, La Razón, Irish Times, Fora, Jacobin, NewsTalk, RTE Radio 1, Tipp FM Radio, Sunday Times, Times, Irish Independent; **(b) Media contributions and blogs:** Population Europe, Inequalities Blog, Piedras de Papel, Politikon, Nada es Gratis.
